It's due out by 2. We will put it on our web page devoted to GenX, <https://deq.nc.gov/news/hot-topics/genx-investigation>.

Larry,

We're still reviewing the latest letter. The latest release was to come today from our sister agency at DHHS. It's related to a comparison of cancer rates for the lower Cape Fear region and the rest of N.C. The agency concluded that there were no unusual findings of cancer rates for the areas where GenX was found in public water, although they did find some increases for certain cancers in two counties and a lower incidence of certain other types of cancer in two other counties. We are still working out our plans for release of sampling information.

Jamie,

Just a gentle reminder – please don't forget to send your public response letter, and the draft PR when you have time. I will send you our most recent desk statement once its updated.

Thanks,

Larry
